tine to a regular tine.

IMPROVED WEAR. EXCEPTIONAL VALUE.

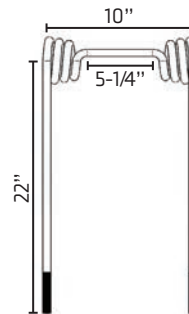

The MAX LIFE™ process infuses tungsten carbide onto the harrow tine creating the toughest and most economical option available. Field tests have proven that MAX LIFE™ tines outlast regular tines by a minimum of 6X.

FIELD TESTED. OUTSTANDING RESULTS.

"We were looking for harrow tines for our Elmers Super 7 harrow and our dealer recommended we try MAX LIFE Harrow Tines. After 17,000 acres we are still running those tines. They have proven to be cost-effective and long-lasting, with no breakage at all, and they leave a great spring and fall field finish."
