BLUE ARMOUR

Sweeps, Spikes & Chisels

Blue Armour is available in select products within our bolt-on, 200 & 410 Series *Speed-Loc™* quick change sweeps, spikes, and chisels. It is not available in products that have a wear pad welded to it.

FIELD TESTED WITH OUTSTANDING RESULTS.

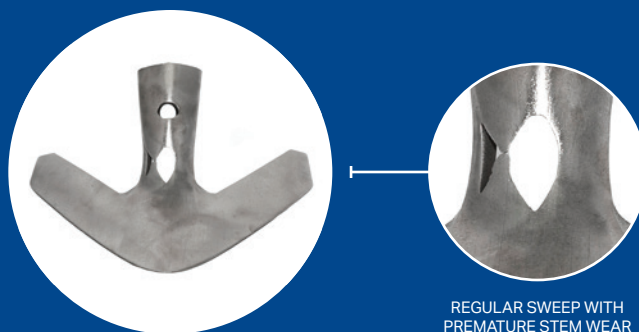

A number of field tests have been conducted in North America and Europe. The sweeps, as shown on the right, are from a test conducted by an OEM in Germany using a small, 4 metre machine.

Results have shown that Blue Armour improves wear life by 24-30%. The variation in wear results is attributed to the variety of soil and field conditions encountered during testing.

ELIMINATING WEAR PROBLEMS.

Extreme stem wear, as shown in the photo to the right, is a common problem in many field conditions. Field testing on the Blue Armour sweeps showed that premature stem wear is eliminated.

"It was a tough spring for wear on sweeps but the BTT sweeps are a good product. I think they wore more evenly and slightly longer than the John Deere sweep, hard to tell how much longer they lasted due to the dry soil. I liked the longer neck on them as well. The bottom bolt gets wear on it before they need to be changed but the longer neck seems to minimize that."

Kyle Jorgenson, Benson County, North Dakota
