BTT *MAX LIFE*™ HARROW TINES

3 Year Limited Warranty

From the date of purchase against breakage for three years prorated to a maximum of 100%.

LONGER WEAR LIFE. EXCEPTIONAL VALUE.

The *MAX LIFE* process mixes tungsten carbide directly into the molten weld bead and applies it to the tip of the harrow tine, creating the toughest and longest-lasting option available.

It's cost-effective and years of rigorous field tests consistently show that *MAX LIFE* Harrow Tines outlast regular harrow tines by up to 6X.

TINES TO FIT ANY COLOR.

Original manufacturer tines for Degelman heavy harrows **PLUS** replacement tines are available in multiple sizes to fit Bourgault/Delmar, Brandt, CNH/Flexi-Coil, Degelman, Elmer's, Gates, John Deere, Morris, Pillar, Rite Way, Salford, and Summers/Herman.

Our lineup is always expanding. Ask your dealer, or contact us, for the latest additions.

10,000 acres of wear comparing a MAX LIFE tine to a regular tine.

PROVEN RESULTS.

"*MAX LIFE* Harrow Tines have proven to outperform a regular tine many times over. There is no more need to worry about excessive tine wear in dry soil conditions before the fall rain. People tend to put off harrowing when the soil is too dry. Harrowing behind the combine as soon as possible maximizes the benefits of straw management and even next years' germination.

This product changes the harrowing/time management decision, and there is a good chance the life of this tine will be close to the life of the harrow bar itself. I wouldn't hesitate to recommend the *MAX LIFE* tine to anyone."

Shawn Blandin, Synergy Farms, St. Brieux, SK
