BLUE ARMOUR™

Sweeps & Chisels

Blue Armour™ is available in select products within our Bolt-On, 200 & 410 Series *Speed-Loc™* Quick Change sweeps and spoons. It is not available in products with a welded wear pad.

FIELD TESTED WITH OUTSTANDING RESULTS.

A number of field tests have been conducted in North America and Europe. The sweeps, as shown on the right, are from a test conducted by an OEM in Germany using a small, 4 meter machine.

Results have shown that Blue Armour improves wear life by 24-30%. The variation in wear results is attributed to the variety of soil and field conditions encountered during testing.

ELIMINATING WEAR PROBLEMS.

Extreme stem wear, as shown in the photo to the right, is a common problem in many field conditions. Field testing on the Blue Armour sweeps showed that premature stem wear is eliminated.

"We are pleased with the performance of our Blue Armour Sweeps. We were hoping for 30% more usable life than the competitor's sweep but we are getting closer to 50%. The wear pattern is better because Blue Armour retains the leading tip of the sweep much longer. This keeps us at a more consistent depth."

Ryan Tucker, North Dakota, USA
