BTT *MAX LIFE™*

Power Hiller Tines

LONGER WEAR LIFE. EXCEPTIONAL VALUE.

Built to enhance the performance of your power hilling machine, *MAX LIFE™* Power Hiller Tines are laser cut from hardened steel with weld-infused tungsten carbide applied to the leading edge.

Both short and long versions are available with multiple bolt hole configurations used to fit many makes and models, including Struik, Baselier, AVR, Grimme, Bau-Man, and more.

IMPROVED PERFORMANCE. LESS DOWNTIME.

MAX LIFE Power Hiller Tines are instrumental in optimizing potato crop quality and yield. Tines are longer wearing than hard-surface options and will not chip or break off like tile carbide in rocks and stones. Built tough, *MAX LIFE* tines reduce replacement costs and minimize downtime changing cumbersome tines.
