Väderstad Seed Hawk

Bourgault Tillage Tools

 tillagetools.ca

FITS C-SHANK, EDGE-ON & INDEPENDENT SHANK DRILLS

Multi-Shoot Openers

MORE OPTIONS. SMARTER FARMING.

Side Band and Paired Row openers have several seed and fertilizer placement options to fit most C-shank, Edge-On and Independent shank drills including Bourgault, John Deere, Morris, CNH, Flexi-Coil, Horsch, and Väderstad Seed Hawk.

Openers have welded or replaceable tips with or without vertical seed and fertilizer separation. Select seed openers have Liquid Phos options.

SEED & FERTILIZER PLACEMENT OPTIONS.

Side band and paired row replaceable tips give you options for placing seed and fertilizer on the same plane or with vertical separation.

SIDE BAND

PAIRED ROW

Seed is placed in a 3/4" band onto a firm, unfractured seedbed. Fertilizer is delivered in a band off to the side on the same level as the seed.

Fertilizer is placed 3/4" below the seed bed in a 3/4" wide row. Seed is placed 3/4" above and to the side of the fertilizer in a 1-1/2" band after the tip's wing seals the fertilizer trench.

Fertilizer is placed in a 3/4" wide row on the same level between the rows of seed. Seed is directed rearward through the tip and placed in two rows onto a firm, unfractured seedbed.

Seed is placed in two rows on either side of the fertilizer trench after it is sealed by the tip's wing. Fertilizer is placed 3/4" below the seed bed in a 3/4" wide row.
